

Clean Water

The Gift of Life

*Becoming a partner
in providing life
saving clean
drinking water.*

*Making a
difference in
this world*

Living in Faith

Clean Water....

something we take for granted in the United States. Often we do not think of what life would be like without clean water.

Living in Faith is a ministry working in Cuba, Haiti and the Dominican Republic. One of our ministry projects is to provide clean drinking water through building Water Purification Systems in church facilities.

The system prevents diseases such as typhoid fever, hepatitis, amoebic and bacillary dysenteries, giardiasis, and other gastrointestinal infections.

There are about 4 billion cases of diarrhea in the world each year. 2.5 million of these cases end in death. Most of these are among children under the age of five. This is equivalent to one child dying every 15 seconds or 20 jumbo jets crashing every day. Living in Faith can contribute to reducing these figures. You can partner with us to make difference in the world!

*Problems like these
have solutions and
you are part of the
solution.*

Living in Faith has a unique opportunity to install Water Purification systems in

churches in Cuba...a historic first! The door is open now and we must act fast while the opportunity exists! We have already installed systems in Haiti and requests have come in from the Dominican Republic. All of these countries our on our doorstep...

*in less than the distance
from Florida to Ohio, we
are making a difference
with our neighbors!*

Before each system is installed a bacterial analysis is completed to determine the need. The In-Country partner church agrees to operate the system and to provide water to anyone in the community that has a need. Equipment is sent from the US and other supplies are purchased in country. Living in Faith provides the technical team to properly install and train the people in the proper use, maintenance of the system and water quality monitoring. Our purification system is redundant to help provide greater assurance of clean water. Over 300 gallons per hour can be produced from our system.

Living in Faith

The countries we work in are too poor to purchase these systems themselves. Living in Faith matches partners in the USA with locations where systems are needed. Systems are needed in churches, youth camps, seminaries, retreat centers, and health care facilities.

Why you should help...

Being born in the USA in the 20th Century has given us the blessing of not facing daily health problems due to poor water quality. You are receiving this blessing without having done anything to earn it. Let us share this blessing with others who can least afford it!

How you can help...

Your donation makes possible a continuous flow of clean drinking water. This water gives life! It is distributed through church facilities that offer opportunities for other ministry to take place in the neighborhood. The daily contact with the neighbors gives the church an opportunity to share in a personal way with those who otherwise might never come to the church.

A young girl in Haiti who came for water receives ministry

How to Partner...

Individually, you can pray for our work. Prayer is an essential part of our ministry.

A donation to this project would be a great family project or a project for small groups, Sunday School Classes or other groups of individuals. You could use this project to bring about awareness of the need for clean hands and clean water to drink or about our neighboring countries and why you are reaching out to help.

Living in Faith is a 501 (c) 3 not for profit organization. Your donations are tax-deductible.

Count us in as a Partner!!
We would like to make a contribution which can change lives!
